## **Section: The Environment and Society**

Read the passage below and answer the questions that follow.

The decisions and actions of all people in the world affect our environment. But the unequal distribution of wealth and resources around the world influences the environmental problems that a society faces and the choices it can make. The United Nations generally classifies countries as either developed or developing. Developed countries have higher average incomes, slower population growth, diverse industrial economies, and stronger social support systems. They include the United States, Canada, Japan, and the countries of Western Europe. Developing countries have lower average incomes, simple and agriculturebased economies, and rapid population growth. In between are middle-income countries, such as Mexico, Brazil, and Malaysia.

## **IDENTIFYING MAIN IDEAS**

One reading skill is the ability to identify the main idea of a passage. The main idea is the main focus or key idea. Frequently a main idea is accompanied by supporting information that offers detailed facts about main ideas.

2. List two developed countries.			
OCABUL	ARY DEVELOPMENT		
the spactatement.	ce provided, write the letter of the phrase that best completes each		
3.	Developed countries often		
	<b>a.</b> have higher average incomes and faster population growth.
